OVERVIEW OF TACTICAL MXP: The **Tactical MXP** by Tandberg provides media-grade video conferencing capability from rugged field locations. It is ready to go with a built-in video screen and camera. Just open the case and connect using high speed internet or ISDN. The basic system supports 1.5 Mbps of H.323 IP-based video or SIP and 384 kbps of H.320 ISDN-based video. Most H.323 or H.320 compliant videoconferencing systems are compatible with the Tactical MXP. Other important features are a PC card slot for a wireless LAN connection and support for IP Quality of Service (QoS). *Includes: Tactical MXP with integrated Codec, LCD, camera, remote control (2), microphone and speaker, headset, automobile power adapter, cables, and power supply. A one-year maintenance package comes with each system that provides Tandberg telephone and internet support.*

SECURE VIDEO: The Tactical MXP system supports secure video communication using DES and the highest level of standards-based embedded **encryption** (AES). Type I encryption devices can be used with the Tactical MXP for further security. *Other variants: Tactical MXP V.35 supports 384 kbps V.35 and 1.5 Mbps IP.*

TACTICAL II RENTAL: When you need realtime two-way video conferencing in tough field locations, we recommend renting a **Tandberg Tactical II**. It has a built-in video screen and camera so you are ready to conference as soon as you open the case. It supports IP-based H.323 using Streaming IP or Standard IP. It also supports ISDN-based H.320.

WHAT YOU NEED: All you need is a high speed internet connection over a land or satellite based internet network. ISDN service can also be used. Though the system includes its own camera and audio equipment, you can use your own compatible cameras and audio equipment. Call our technical support to verify compatibility. You need one system at each end of a two-way video conference. Most H.323 or H.320 compliant videoconferencing equipment is compatible but there are advantages to using Tandberg equipment on both sides so we recommend that you rent a second Tactical II for your corporate side.

FRAME RATES:

15 frames per second @ 56 - 128 kbps
30 frames per second @ 168 - 768 kbps

LIVE VIDEO RESOLUTION:

NATIVE: NTSC 4SIF (704 x 480 pixels), Digital Clarity Interlaced SIF (352 x 480 pixels) Natural Video SIF (352 x 240 pixels)
